

Q Given an array of N elements.
Find the majority element!
↳ An element with $\text{freq} > N/2$

$A: [1, 2, 1, 6, 1, 1]$
✓ ✓ ✓

$N=6$
 $Mt=1$ $\text{freq}(1)=4 > 6/2$

$A: [1, 2, 2, 6, 1, 1]$
X Mt

$f(6) > N/2$
 $f(1) > N/2$

$A: [3, 3, 4, 6, 1, 3, 2, 5, 3, 3, 3, 3]$

$Mt=3$!

$N=12$
 $\rightarrow 7, 6$
 $f(3)=7$

I) BF

if element find the freq.

$TC = O(N^2)$

$SC = O(1)$

II) Sorting

$A = [1, 3, 1, 5, 3, 3, 3, 5]$

Heap Sort

$TC = O(N \log N)$

$SC = O(1)$

III) Hash Map

$A = [1, 3, 1, 5, 3, 3, 3, 5]$

$O(N)$ → $\langle \text{ele}, \text{freq} \rangle$

$\rightarrow \langle 1, 2 \rangle$
 $\rightarrow \langle 3, 4 \rangle$
 $\rightarrow \langle 5, 2 \rangle$

$O(N)$

$TC: O(N)$

$SC: O(N)$

IV

MOORE'S VOTING ALGORITHM

Q Can there be more than 1 ME?

$$\begin{array}{l}
 \underline{x, y \rightarrow ME} \\
 f(x) > N/2 \\
 f(y) > N/2 \\
 \hline
 f(x) + f(y) > N \quad X
 \end{array}$$

→ there is AT MOST 1 ME !!!

$A: [1 \ 3 \ 1 \ 5 \ 3 \ 3 \ 3]$

\downarrow

$[1 \ 3 \ 1 \ 3 \ 3]$

$N \quad ME \quad f_r(ME)$
 $-2 \left(\begin{array}{cc} 7 & 3 \\ 5 & 3 \end{array} \right) \begin{array}{c} 4 \\ 3 \end{array} \right)^{-1}$

① If I del 1 occ of ME
 1 — NME

→ the ME does not change!

②

A: [1 3 3 ~~1~~ 3 ~~5~~ 3] → ME 3

A: [1 3 3 3 3] → 3

→ If I del 2 Diff NME's [1 occ.]
 → the ME does not change!

→ If I del ANY 2 diff. elements
 the ME. would NOT change!

A: [~~4~~ ~~4~~ ~~3~~ ~~8~~ ~~8~~ ~~4~~ ~~9~~ ~~7~~ ~~4~~]

ME
4

A: [~~4~~ ~~3~~ ~~2~~ ~~1~~ ~~4~~ ~~4~~ ~~5~~ 4 4 7]

A: [~~1~~ ~~2~~ ~~4~~ ~~1~~ ~~4~~ ~~5~~ ~~1~~ ~~4~~ ~~1~~ ~~4~~]

4 →

[~~2~~ ~~2~~ ~~2~~ ~~2~~ ~~3~~ ~~3~~ ~~3~~ ~~3~~]

Validate:

$$f(4) = 5 > 2\frac{1}{2}$$

∴ 4 → ME ✓

$$f(3) = 3 \neq \frac{6}{2}$$

3 → NME

→ there is NO ME!

$cnt = -1$, $f = 0$;

$f(i=0; i < n; i++)$ {

if ($f == 0$) {

$cnt = A[i]$;

$f = 1$;

}

else if ($cnt == A[i]$) {

$f++$;

}

else {

$f--$;

}

}

$f = 0$;

$f(i=0; i < n; i++)$ {

if ($cnt == A[i]$) {

$f++$;

}

}

if ($f > n/2$) return cnt

return -1 ;

$TC = O(N)$

$SC = O(1)$

$\mathbb{P} \rightarrow$ After how much time
 will all the ANTS
 fall off?

Speed of ANTS
 $= 1 \text{ unit/sec}$
